1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "sink" set forth in the claim must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required

corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The claim is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claim recites a sheet of material "that covers a sink" and includes a recess "to allow the sheet to fold". How such a sheet is rigid enough to cover a sink, but flexible enough to be folded is neither taught by the instant disclosure nor evident to the examiner.

3. The claim is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is unclear as to whether the "sink" is intended to be part of the claimed combination since structure of the "instrument" is defined as being connected thereto (ln. 2), but no positive structural antecedent basis therefor has been defined.

Art Unit: 3751

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. The claim, as best understood, is rejected under 35 U.S.C. 102(b) as being anticipated by Schilling.

The Schilling reference discloses an instrument comprising:  
a sheet of material 1 including a recess 2, as claimed.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The Elsas and Windsor references disclose various instruments having features in common with the instant invention.

7. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.

8. Any inquiry concerning this communication should be directed to Robert M. Fetsuga at telephone number 571/272-4886 who can be most easily reached Monday through Thursday.
